

Consent-led NHS GP Record Access for Cosmetic Dentistry

Safer implants, oral surgery, sedation & prescribing ... with less admin

With patient consent, ORB Connect gives clinics secure access to live NHS GP records, via a secure portal to verify medications, allergies and clinical red flags before treatment.

Access to NHS GP Records

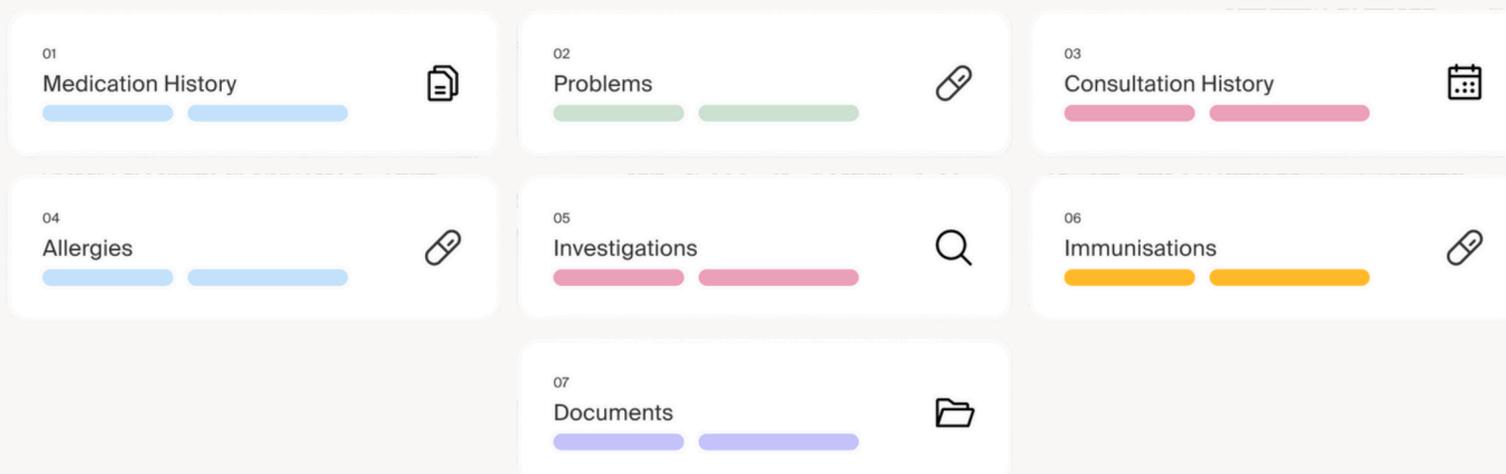

What is visible in the record:

- ⊕ Consultation notes - as written by the GP
- ⊕ Medications, risk flags & MRONJ-relevant medicines
- ⊕ Problem lists - with filtering
- ⊕ Allergies - with dates & reactions
- ⊕ Immunisations - in chronological order
- ⊕ Investigations - track trends & changes
- ⊕ GP Documents - letters, reports

Patient Control & Consent

Patients are always in control of what health information they share, and with whom.

- ⊕ Patients link their NHS App to ORB
- ⊕ They consent to share records
- ⊕ They can adjust or stop access at any time
- ⊕ They can view all their records in one place
- ⊕ Parents/guardians can grant access for younger children - setting up the NHS App by proxy

Benefits for Clinicians

- ⊕ Support safer treatment planning: verify meds, allergies and red flags before cosmetic, implant or surgical care.
- ⊕ Reduce delays and chair-time risk: avoid chasing GP summaries and follow-up calls.
- ⊕ Improve prescribing confidence: clearer medication history to support interaction/allergy checks.

Benefits Across the System

- ⊕ Clinics: stronger documentation and quicker verification to complement clinical assessment.
- ⊕ Patients: less effort recalling meds/history; clearer control over sharing.
- ⊕ GP practices: fewer administrative requests for summaries.

Security & Compliance

ORB Connect adheres to GDPR and ISO 27001 regulations, safeguarding personal data with strict protocols and robust security measures.

ORB is NHS assured - access is consent-led and role based at every step, with a transparent audit of what is viewed, by whom and when.

ORB has earned accreditation as:

- ⊕ NHS Assured Supplier for Medical Management Software
- ⊕ An NHS Data Security and Protection Toolkit (DSPT) compliant organisation
- ⊕ Awarded the Cyber Essentials Certificate of Assurance
